

# Competition Waves at the Castle Race Series

In the case of multiple wave starts for one race distance, we have adopted the Competition Wave group allocation. Only those in a Competition Wave will be considered for Prize Giving at the event.

This is a system we have adopted for many years now to avoid very long waits for prize giving. However online timings will of course include all participants in all waves, showing the complete set of results and therefore, in some cases, include placings that were not included in Prize Giving.

During the booking process we make reference to this system and ask if participants would like to opt-in or opt-out of a Competition Wave.

Participants are placed in a Competition Wave depending on the answers given during the booking;

- those who chose to opt-in,
- those with faster estimated swim or finish times, and in some case,
- those who have used a Unique Code to start with friends and the majority of that group has chosen to opt-in.

Up until 2 weeks prior to race day, it is possible to edit some of the answers on your booking.
